

# Airo 2KW

**At last a diesel heater which is:**

- ▶ **Quiet**
- ▶ **Easy to fit**
- ▶ **With low cost of ownership**

The Airo 2 is a new diesel heater which is easy to fit, economical, light weight with low current consumption. The Airo 2 is fully automatic in operation with a simple rotary control for stepless output from 0.9kw to a full 2kw. It takes diesel fuel from the vehicle tank via it s own fuel pump (supplied in the kit) and delivers it to the heater in precise amounts to give a clean burning low noise exhaust which exits underneath the vehicle.

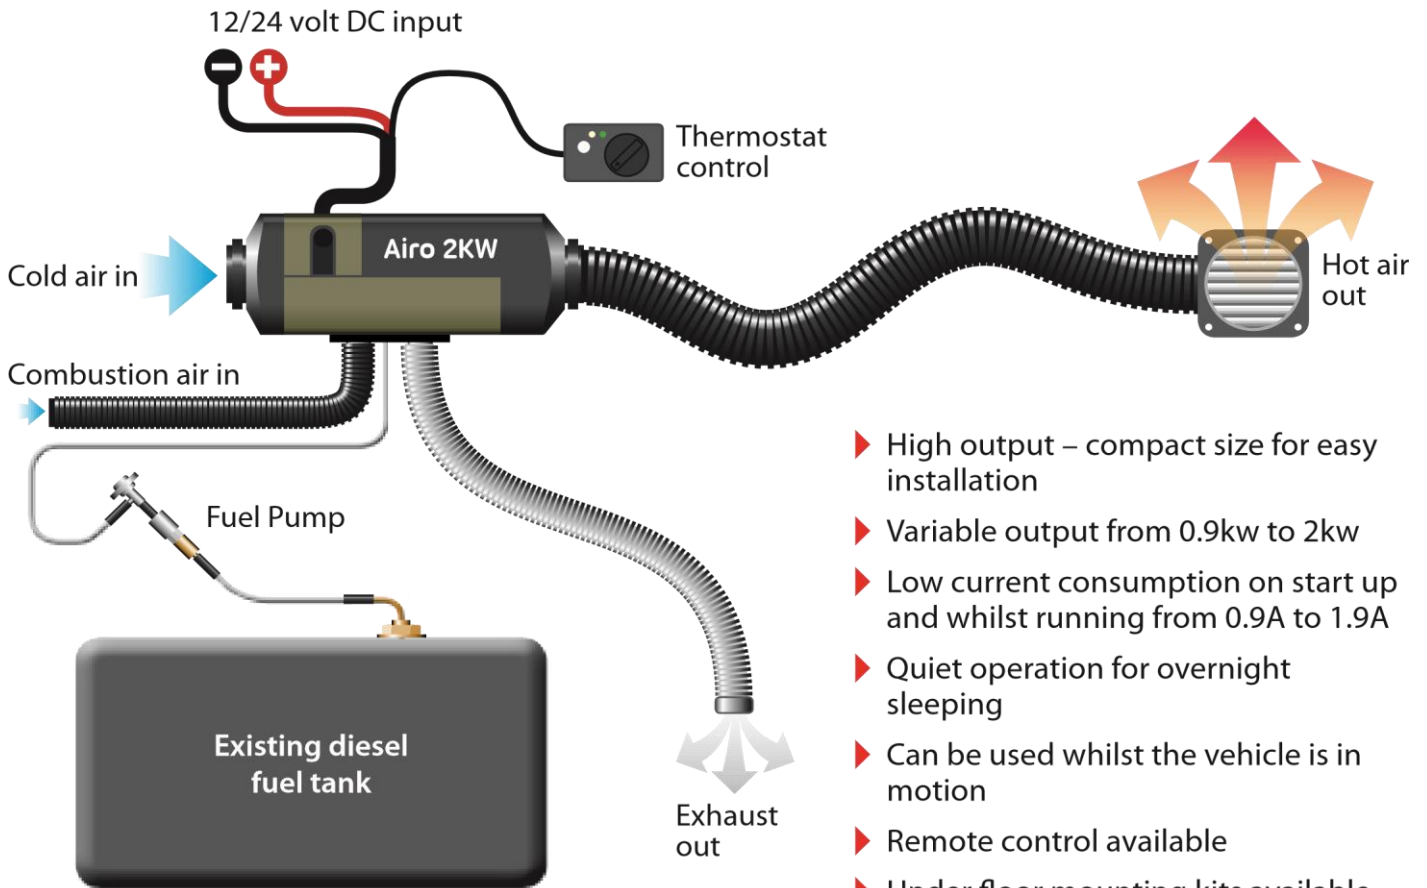

The warm dry air is circulated around the interior of the vehicle by the built in fan which is low in noise, but the efficient design means current consumption is kept to a minimum. At low setting the heater is drawing only 0.9A from the battery. At last a competitively priced low running cost diesel heater for the leisure industry.
